>What I need to know is what kind of battery it uses, or at least the  
>operating voltage and the voltage and amperage of the ac adapter.

My NLS MS-15 uses 3-2V sealed lead acid ("gell cells") for a 6V  
supply. As I recall, the charger is 9v, but I don't remember if it is  
AC or DC and I cannot  
locate my charger right now.
